

# Gabriel Ivan

imagination is more important than knowledge... as knowledge is limited

**I have come a long way, exploring at first, leading afterwards, and sometimes even sailing on the storms of life...**

Started my journey in 1994 as a very young logistics planner. In 2003 I got a Bachelor in Economics. I've been working in several major companies, from Wrigley to Unilever, Diversey, SealedAir, Bunzl. Never stopped learning and exploring. I've been a Merchandiser, Area Sales Supervisor, Key Account Executive, Business Unit Manager, I&L Director and finally, starting with this year, after 23 years of hard work, I enrolled on a new venture as Managing Director of one of the strongest companies on the Romanian market, CHEP, a global leader in supply chain solutions. These are my values...the ones that always brought me safe to the shore...

1

## LEADERSHIP

If the storm is out there, I'll be leading past it.

2

## TEAMPLAY

Never fear to share: knowledge, information, assets...

3

## SKIPPER LIFE PHILOSOPHY

There is no strong captain without a trusting crew.

### At the office

Everyday I use judgment to map priorities and inspire my colleagues

### At school

EMBA classes have helped me get the better and broader picture. So now I am playing with it...

### In my private life

Love sailing and cooking for family and friends...
